Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Cellular One's compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company's web site, and its retail salespeople are trained to assist with complaint digital wireless phones. Written materials, pamphlets and other promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Consumers are given a 30-day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

## Methodology for Functionality Levels

Cellular One of East Central Illinois offers a variety of handsets to meet the needs of customers with hearing disabilities:

Low-Tier Phones offer basic wireless telephone features, may not have a camera, Bluetooth, or Internet access capability, and generally lack such features as MP3 players and expandable memory. The designs are typically bar or flip for customers using voice or text only.

Mid-Tier Phones may have a camera, Bluetooth or Internet capability, but are less likely to offer video/music/media player capability. The designs are less stylish and tend to be clamshells or flips.

High-Tier Phones have more extensive features, such as Bluetooth, Internet access capabilities, increased storage or expandable memory, high-resolution color display, enhanced camera or video capabilities, and music or MP3 player functionality. The designs are more modern, sleek and are often slider form factors.

PDA & Smartphones typically have QWERTY or touch keypads and go beyond just making phone calls to including operating systems that allow the phone to run productivity applications and have software that may enable you to create and edit Microsoft Office documents or at least view them, download applications, edit photos, access the web, and more.
